

Check writer

Description

Given a Euro amount between 0 and 999,999.00 the program should output a worded representation of an Euro amount on a check.

The following inputs (float or integer) are all the same:

```
25001
25001.0
25001.00
```

And the output for each of them should be:

```
Twenty five thousand one Euros and zero cents.
```

The task

Write a program that takes number input and outputs the worded representation of the amount.

More example inputs:

```
112.10
874327.9
978
1.01
```

and the outputs:

```
One hundred twelve Euros and ten cents
Eight hundred seventy four thousand three hundred twenty seven Euros and ninety cents
Nine hundred sevety eight Euros and zero cents
One Euro and one cent
```

Requirements

The solution should have no external depdendecies.
